

# SUSTAINABILITY AT ACACIA AVENUE

We have been recording and measuring our carbon emissions since 2019

Online fieldwork is one way of reducing our emissions. It's not right for every project but something we weigh up each time alongside the project objectives.

EcoVadis  
Silver rating

648kg

799kg CO<sub>2</sub>   
saved by recycling in 2025

materials recycled in 2025

We have more than halved our travel emissions since 2023

165 volunteering hours...

...and counting

We have removed meat options from our **Monday lunches** – now serving only veggie and vegan dishes, many sourced from local, independent businesses

We take part in the Big Plastic Count

16 trees saved so far

64%

We have reduced our scope 2 emissions by over 64% since 2023. We did this by focussing on small things like turning plug and light switches off.

To keep our data consumption low we have a robust data retention policy for media, video and email

We've optimised our service providers

We compress large media files before saving to our server

**64.4%**  
reduction in data

Without compromising the security or quality of our work and data, we have reviewed our IT infrastructure and reduced data on cloud hosting servers and local servers by 2.6TB
